### **NCOCC Tech Expo**

Ever wonder how technology is being utilized in your child's classroom? How are teachers integrating the 21<sup>st</sup> century into their lessons and making them engaging for the students? What are they doing with technology to make planning more effective? Now you can come see for yourself how educators and students alike are digging into 21<sup>st</sup> century tools within their classrooms.

NCOCC is proud to be hosting our third annual Tech Expo on April 14th from 6:00-8:00 p.m. located at 1495 W Longview Ave, Room 235, Mansfield.

This event will bring in teachers from multiple districts that will showcase their use of technology in and outside the classroom. They will highlight how they utilize the technology to make their lessons more interactive, engaging, efficient, and effective.

Projects cover grades K-12 and in the past have included such things as: Interactive White Boards, Classroom Response Systems (clickers), PowerPoint, Podcasts, CNC Technology, Etherpad, Web Design, Moodle, Video Production, Software integration and more! Not only do teachers use these technologies to become more effective and engaging with their lessons but they do so to increase student learning.

Community members, teachers, parents, administrators and students are all encouraged to attend. You will have an opportunity to talk one on one with each presenter.

This is an opportunity to see everyday educators doing amazing things with technology in their classrooms and with their students. **We will also be giving away one eReader, courtesy of Mid-Ohio Educational Service Center (MOESC), to an attendee or presenter.**

Contact Kalin Wilburn, Professional Development Coordinator, NCOCC, for more information. NCOCC, North Central Ohio Computer Cooperative, is the Internet provider for most of the area districts along with meeting the needs of districts for state reporting, grade book software and Parent Access.
